

Tire Treads

Improved 25%

The latest Miller triumph is a super-grade tread. It exceeds the best rival treads today by an average of 25 per cent. This has been proved, under careful watch, by many road comparisons. The Miller Tire mileage is the talk of the day. But these new-grade treads outwear the balance of the tire.

Not one Miller Tire, built with this new tread, has ever come back with the tread gone. These treads do not vary. Every day the Miller tread stock is vulcanized and tested in the laboratory. It must prove up to these new standards before a tread is made.

Miller Cord Tires, in the factory tests, now average 15,000 miles. Miller Fabrics from 8,000 to 9,000 miles. And these factory tests are extreme.

Watch your mileage on one Miller Tire. Compare it with any other and it will win you. You owe that to yourself in view of Miller records.

Tread Patented

Earned Capital

... IS BEST ...

In investigating the financial standing of a man just entering business the mercantile agencies always try to find out whether he has earned and saved his own capital, or whether it was inherited.

Dun and Bradstreet know that a man who has taken years to save his own capital has, during that time, formed habits of thrift and learned lessons in economy that will help him greatly to succeed, where the man whose capital "came easy" would fail.

There are many more reasons for saving than the mere amount of money to be accumulated. Have you started saving yet?

Every Inch of the Bates Steel Mule is Thoroughbred

The United States government by means of the Department of Agriculture, has been looking into the tractor question, and its bulletins clearly prove that the satisfied tractor owner—men who say that the tractor has paid—are men who own the BETTER CLASS of tractors. The successful man has learned years ago that he can't get something for nothing. No one can. The reason the BATES STEEL MULE costs more is that it is worth more. Skilled factory procedure, quantity production and the most modern Machinery enables us to save money at every turn, yet the BATES STEEL MULE cost slightly more in the beginning to build but considerably less in the long run to own. It's just another case where a seemingly higher priced article is as cheapest to own when you come to actually USE it.

The Bates thoroughbred quality comes not from mere claims, but from what's put into it. Every part that goes to make up the BATES STEEL Mule is put there by long field experience. There isn't a part that isn't time-tried and tested. There isn't a part that experience hasn't dictated the shape and size of; and in it all there isn't one superfluous part, nor one part that isn't capable of standing up under twice the strain it gets in actual use. These are things experience and practice have distracted. The BATES comes to you as a fulfillment of your desire for a tractor that will endure. Price is what we pay for a thing. Value is what we get out of it. Consider your tractor from what you will get out of it, consider how many working days you have when the ground is wet, consider the operations where you can not afford to pack your seed bed, and consider how constantly and economically they must be performed even in rush times, you will then see why the BATES STEEL MULE is the biggest value offered in any tractor on the American market today.

We want this Bank to be different--

To breathe a different spirit, to reflect a different attitude than is said to prevail in some financial institutions.

We desire that this shall be a bank of willing, cheerful service—broad in its views, generous in its sympathies, helpful in its strength—conservative only when conservation is necessary to maintain that strength.

We want the conscientious interest that we hold for the welfare of our customers to be the magnet which will attract and hold the patronage of a discriminating and appreciative public.

We desire that this spirit shall prevail in every department and be reflected in the helpful attitude of every employee.

This has been our endeavor in the past. It will continue to be our aim and purpose in the future.
